WANDER MANAGEMENT SOLUTION

ResidentGuard LS2400 vs. WanderGuard BLUE

With a variety of wander management solutions on the market, it can be a daunting task to determine the best system for your facility. Accutech's ResidentGuard LS2400 system is designed to provide long-term protection and comfort to the residents entrusted to your care. Here's how our system stacks up when compared to the competition.

WANDER MANAGEMENT SOLUTION

Scorecard Details

Money-back Guarantee

Accutech is so confident in ResidentGuard's ability to be free from interference, that we offer a money-back guarantee. If there is an interference issue that we cannot overcome, we will refund the purchase price of your equipment.

Requires Tablet Device for Reporting

When solutions are only available through a tablet device, system cost can escalate quickly. Most senior care facilities experience a high replacement cost for the tablets as they are dropped, lost or stolen from the facility. ResidentGuard does not rely on tablets for reporting.

Direct Nurse Call Integration

Flexibility is important when it comes to providing complete solutions for your senior living facility. ResidentGuard has direct integrations with more than ten nurse call systems (and growing). The WanderGuard BLUE system only offers integration to the proprietary, and expensive, Arial nurse call system.

Frequently, senior living facilities are looking for a stand-alone wander management solution. Later, when they are ready to add a nurse call system, it's important to have options. Some manufacturers sell their wander management solutions as a loss leader and then limit the integration to nurse call systems, knowing that these proprietary, high-priced future additions will more than make up for the wander management solution price.

Name and Photo ID for Every Resident Tag

The ability to identify a resident by their name and photo improves the efficiency and usability of the wander management system. WanderGuard BLUE merely assigns a ten digit code to each resident for identification purposes.

Supported by Integrators with Decades of Industry Experience

ResidentGuard is sold through and supported by integrators who have been in the industry for decades. These integrators possess a wealth of knowledge for system recommendations and support which is critical to the successful deployment and ongoing security of the wander management solution.
